

*The role of the Royal Swedish Academy of Agriculture and Forestry is, with the support of science and practical experience, to promote agriculture and forestry and related activities, for the benefit of society. The Academy was founded in 1811 at the initiative of Karl XIV Johan and started its work on 28 January 1813.*

## Seminar

### Salmon and their management – new perspectives under changed conditions

<b>Time</b>	Wednesday 7 October, at 10.00–16.00 (coffee and registration from 09.30)
<b>Venue</b>	The Royal Academy of Agriculture and Forestry, Drottninggatan 95 B, Stockholm, Sweden
<b>Registration</b>	No later than 4 October via <a href="#">this link</a> or through our website <a href="http://www.ksla.se">www.ksla.se</a> .
<b>Fee</b>	The seminar is free of charge, but cancellations must be made no later than 4 October, or we will invoice SEK 500 to cover costs.
<b>Web</b>	The seminar will be webcast, link at <a href="http://www.ksla.se">www.ksla.se</a> .
<b>Questions</b>	Content: Eva Ronquist, <a href="mailto:Eva.Ronquist@ksla.se">Eva.Ronquist@ksla.se</a> , tel +46 8 54 54 77 06 Registration: Gun Askerö, <a href="mailto:Gun.Askero@ksla.se">Gun.Askero@ksla.se</a> , tel + 46 8 54 54 77 12

**This conference is financed by the Knut and Alice Wallenberg foundation**

Fisheries management has been on the agenda for decades, but as conditions are altered the important aspects change. For Baltic Sea salmon the drastic decrease in off shore commercial fisheries has allowed for increased catches in coastal fisheries and a fast development of salmon trolling, both by individual anglers and recreational companies. Increased spawning runs in naturally reproducing salmon may allow for intensified angling in rivers, while in regulated rivers large quantities of salmon have been found to accumulate downstream hydropower dams. How should we manage salmon under these novel conditions?

The Knut and Alice Wallenberg Foundation has donated 12 million kronor to the Royal Swedish Academy of Agriculture and Forestry on the occasion of the Academy's 200<sup>th</sup> anniversary. With the funds, the Academy has announced one-year guest professorships for researchers of the highest international standard in the fields of the Academy. Professor Ian A. Fleming (Memorial University of Newfoundland, Canada) is the first holder of this professorship. During his year in Sweden, Professor Fleming is working at the University of Gothenburg.

At this seminar Professor Fleming will give an international overview of salmon management, considering both naturally reproducing and stocked populations. This talk will be followed by presentations by researchers, stakeholders and authorities responsible for management and exploitation. The objective of the seminar is not to reach a consensus perspective on salmon management, but to provide a scientific background for discussing different aspects and ideas on future salmon management.

Welcome!

Carl-Anders Helander  
General Secretary and Managing Director, KSLA

## Salmon and their management – new perspectives under changed conditions

Wednesday 7 October, 2015

**Moderator** Stefan Nyström, fellow of KSLA

- 09.30 **Registration and coffee at the Academy**
- 10.00 **Presentation of the Royal Swedish Academy of Agriculture and Forestry**  
Carl-Anders Helander, General Secretary and Managing Director, KSLA
- 10.05 **Introduction**  
Stefan Nyström, fellow of KSLA
- 10.10 **Recovery of salmon populations: from resilience to stocking and captive breeding**  
Ian Fleming, Memorial University, Canada, holder of the first KSLA-Wallenberg professorship
- 11.05 **Short break**
- 11.15 **Baltic Salmon during the 20<sup>th</sup> century and today**  
Johan Östergren, Swedish University of Agricultural Sciences
- 11.35 **Supplementary releases of salmon, problems and opportunities**  
Anders Alanärrä, Swedish University of Agricultural Sciences  
Jörgen Johnsson, University of Gothenburg
- 12.00 **Salmon in the Baltic Sea ecosystem**  
Sture Hansson, Stockholm University
- 12.15 **Lunch**
- 13.10 **Swedish salmon management**  
Håkan Carlstrand, Swedish Agency for Marine and Water Management
- 13.40 **The role of Swedish Board of Agriculture in salmon management**  
Daniel Melin, Swedish Board of Agriculture
- 14.00 **Hydropower and salmon management- possible future perspectives**  
Erik Sparrevik, Vattenfall
- 14.20 **Coffee break**
- 14.50 **Discussion with panelists:**  
Ellen Bruno, Swedish Society for Nature Conservation, Glenn Douglas, Swedish Anglers Association, Hans Lundqvist, Baltic Salmon Fund and Ivar Sundvisson, the Fisheries Association of Västernorrland.
- 15.50 **Conclusion, followed by informal discussions and refreshments**

*Programme may be subject to change*
