

The role of the Royal Swedish Academy of Agriculture and Forestry is to promote agriculture and forestry and related activities for the benefit of society, with the support of science and practical experience. The Academy was founded in 1811 at the initiative of Karl XIV Johan and started its work on 28 January 1813.

Bertebos' Prize Webinar – Tuesday, 7 September, 2021

Towards a New Mindset for Epidemic Animal Diseases

Dr. Peter Roeder, UK, the Bertebos Laureate 2020, is key note speaker at this webinar on the drivers of pandemic emergence and means of control.

In honour of the 2020 Bertebos Prize laureate, Professor Peter L Roeder, the Royal Swedish Academy of Agriculture and Forestry (KSLA) has the pleasure to arrange this international webinar in the field of Transboundary Animal Diseases.

The event is part of the international Bertebos Prize, where the recipient of the prize actively participates in the planning and implementation of a seminar in their field of work. Professor Peter L Roeder has invited some of the leading experts in the field of Transboundary Animal Diseases to give presentations at a seminar which will cover issues that are vitally important for the long-term development of livestock, wildlife and human health. Due to the ongoing pandemic, the seminar will be conducted in the form of a "webinar".

Overleaf you will find the webinar programme.

KSLA would greatly appreciate if you have the opportunity to attend the webinar and in that way contribute to the seminar's success and impact. The Academy therefore looks forward to your registration for participation no later than 31 August.

Kind wishes,
Jan Fryk
President

Eva Pettersson
Academy Secretary General

Date & Venue

Tuesday, 7 September 2021
kl 10.00–16.00 on Zoom.
(The Zoom link will be sent out the day before.)

Registration

Please register no later than 31 August on this link,
