### **For 450 years the Stenström Family has cultivated the land around Slöinge in county Halland:**

“We have taken care of animals, ground flour and made ice cream. And have reached our goals through the desire and ability to develop. We believe that sustainable businesses are created in the same way. What we sow today, we harvest tomorrow. This is why we keep looking for new, smarter ways to do things, so they keep getting better than they were.”
